

[Translated from Arabic:]

The rain is making a mess of things here, we're drowning, we're dying. The water we're swimming in is just a little rain, it's killing us. The caravan is dripping on us, and we're filling buckets with water, but the buckets are all full of garbage. This place is completely destroyed and we do not know how to live. The containers are destroyed. Peace be upon the prophet of Allah, we don't want to deal with the water coming in or the other life conditions that are stressing us out in this place. The whole facility is a mess... This is a disgusting place!
