

In the video, the detainees explain: *"This is the condition of our garbage bin. It has been overflowing like this for two days, and nobody empties it. This is also the place where we shower, use the toilet and wash our clothes. As you can see they do not provide us with a bucket, so we are forced to wash our clothes inside these plastic bags. They also do not provide laundry detergent; they only give us one small piece of soap for an entire month."*

*"As you can see, I am washing my blankets, and even the washing area itself is dirty. Whenever we use these facilities, we all become sick. The toilet is directly in front of us, and as you can see, it is very dirty. They have not provided us with a proper bucket for washing our clothes, so we are forced to wash them inside these plastic bags."*
